CRAIK, SASK., IN 1906

CRAIK, SASK., IN 1911

SASKATCHEWAN

RAIK is situated on the Prince Albert and Winnipeg main line of C N R, just 73 miles north of Regina, about half way between Saskatoon and Regina, and is without doubt the most prosperous town between these stations

Everyone interested in coming West should take the advice of "The Wise Men of the West," and see Craik first. It is situated in the most fertile section of the Province of Saskatchewan, and is the garden spot of the greatest wheat producing area in the world. The soil is of the richest, the rainfall plenty, with an ideal climate for growing the famous No. 1 hard.

The Prairie in this district produces a natural growth of grass that cannot be excelled for the fattening of cattle. Only about one-quarter of the land has been taken, leaving lots of good land that can be bought from \$12 to \$25 an acre.

In 1908 over one million bushels of wheat were marketed here.

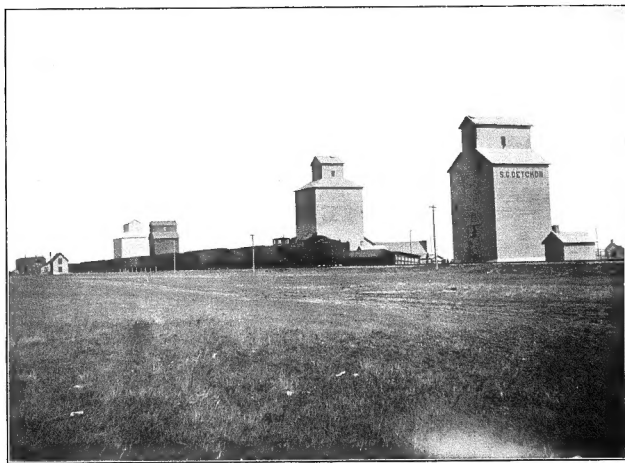

Craik has four elevators, one of which is owned by the farmers, with a capacity of 60,000 bushels, the four elevators making a total of 151,000 bushels elevator capacity.

The community consists principally of Canadians, Americans and English.

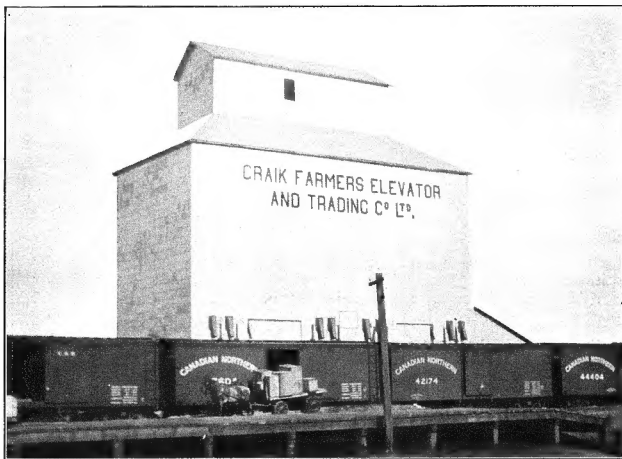

We have three Churches---Methodist, Presbyterian and English. The Roman Catholics and Lutherans also hold frequent services here. Our school is a large, substantial stone building, employing three teachers, and has commenced taking second class certificate work, thus enabling anyone to obtain standing for any profession.

Two hotels look after the accommodation of the public.

Sportsmen will find plenty of game here, as the district abounds in prairie chicken, wild duck, geese, etc.
